The Advantage of Being a Boy.

At the closing of the Rahway (N.J.) grammar school, Adolph Jacobs, aged 13 years, composed and read the following composition on "The Advantage of Being a Boy":

A boy is generally born when he is very young, and gets to be a man before his mother. A boy is not so skittish as a girl. He takes a mouse, which would scare his sister half to death, and ties a string to its tail and swings it over his head. Then he is in his glory and laughs at his sister, who is looking for a knot-hole to hide in. He wears no lace bibs or corsets, petticoats or skirts. A boy possesses ten times more cheek than a girl, but if he ever does any mischief he own up to it with a bright smilling face. Girls are a great deal of trouble to their parents, who have to keep them until somebody falls in love and marries them. Not so with a boy—he takes care of horses, works in the mine and raises a cakin. a boy-he takes care of horses, works in the mine and raises a cabin. All that girls do for exercise is to make dolls, chemises, and crochet work, while the boy, the spark of mankind, is putting up some job to play on his teacher, or playing the glorious game of base-ball. Hurrah! then, for the boys. They are standard bearers of the world!"

GREATEST NEWSPAPER

### THE CINCINNATI ENQUIRER!

In its columns, the news of the world is given every day in the year. Its twothousand correspondents located in every section of this Country and Enrope, are the most reliable news gatherers to be had, and the history of each day's events will be faithfully recorded and presented to the public through the Enquirer, free from distortion or prejudice.

through the Enquirer, free from distortion or prejudice.

The province of a newspaper is to record facts, to separate truth from falsebood. How well the Enquirer has accessed in this duty, we feel a pardonable pride in referring to its files and past record for evidence of its ability and thoroughness in presenting all matters treated upon in their true light.

The people of this age require a paper fully abroast of the times, co equal in embryaries, and material advancement in all mercantile and political interests, such will the Enquirer continue to be. Candor and fairness will be accorded to all questions and parties, but the facts shall never be perverted.

The Immediate Future has in store, matters of grave interest to all, and the general welfare will largely depend upon the influence of those who are fully conversant with facts occurring and to occur. The policy of the government but partially developed by the New Administration, was fast winning the confidence of the people, when the hand of the Assassia placed control of affairs in charge of a faction whose inaders have not at all times received favorable criticisms for their public acts. What the future policy is to be, will be foreshadowed during the first year of President Arthur's administration, and presented to the public, without fear or favor, in the columns of the Enquirer.
